Professional Summary

Software Engineer with professional experience in developing and maintaining enterprise Java applications using **Java 8, Spring Boot, Spring Security, Hibernate/JPA, RESTful APIs, and MySQL**. Currently working at **Tech Mahindra**, contributing to backend service development, API integration, enterprise application maintenance, system validation, debugging, and performance optimization. Strong foundation in **Object-Oriented Programming (OOP)**, REST API development, secure authentication using JWT, and relational database design. Experienced in collaborating with cross-functional Agile teams, participating in code reviews, troubleshooting production issues, and delivering scalable backend solutions. Passionate about building reliable, production-ready Java applications while continuously learning new technologies.

Technical Skills

- **Languages:** Java, Python, C/C++
- **Backend Technologies:** Spring Boot, Spring MVC, Spring Security, RESTful APIs
- **Persistence:** Spring Data JPA, Hibernate
- **Databases:** MySQL
- **AI Dev Tool:** Github Co-pilot, Claude AI, ChatGPT, AI-assisted Code Generation, Debugging
- **Tools:** Git, Maven, Postman, Swagger
- **Concepts:** Microservices, OOPs, JWT Authentication, Multithreading (basics), Collections Framework
- **Cloud & DevOps:** Docker (basic), Linux/Unix

Work Experience

Tech Mahindra Ltd. – Associate Software Engineer (September 2024 – Present) | Bengaluru & Ahmedabad

Project 1: Enterprise Application Development (Java | Spring Boot | AEM)

- Developed scalable backend services using **Java 8** and **Spring Boot**, implementing reusable business logic and modular application architecture.
- Designed, developed, and maintained secure **RESTful APIs** supporting enterprise content-driven workflows.
- Worked on backend services with **Adobe Experience Manager (AEM)** modules for dynamic content management and delivery.
- Improved application reliability through debugging, log analysis, issue resolution, and performance optimization.
- Contributed to backend enhancements following software development best practices and secure coding principles.

Project 2: Meta – Application Setup, System Validation & Testing (Unity | Unreal Engine | VROS)

- Configured and deployed applications in **Unity** and **Unreal Engine** environments for system validation and performance testing of interaction SDK.
- Performed backend API validation and end-to-end system testing for Meta's enterprise VR platform.
- Validated distributed backend workflows across multiple integrated software components.
- Collaborated closely with developers to reproduce defects, perform root cause analysis, and verify issue resolution.
- Executed system integration testing, API validation, regression testing, and defect verification following STLC practices.
- Worked closely with cross-functional engineering teams to ensure platform stability before production deployment.

Personal Projects

1. **ShopSphere** – E-Commerce Backend System (Java | Spring Boot | Spring Security | JWT | MySQL | JPA)

- Designed and developed a scalable e-commerce backend application using Java, Spring Boot, Spring Security, MySQL, and JPA/Hibernate.
- Developed RESTful CRUD APIs for product management, user management, shopping cart, orders, and payment workflows.
- Implemented secure authentication and authorization using JWT with Role-Based Access Control (RBAC).
- Implemented pagination, sorting, filtering, validation, and exception handling for production-ready API responses. Designed relational database schema and optimized entity relationships using JPA/Hibernate.
- Documented and tested REST APIs using Swagger/OpenAPI and Postman.

2. **SecureAuth** – Authentication System (Java | Spring Boot | Spring Security | JWT | MySQL)

- Developed a secure authentication and authorization service using Spring Boot and Spring Security.
- Implemented JWT-based access and refresh token authentication for stateless security.
- Built email verification, account locking, password encryption using BCrypt, and role-based authorization.
- Customized Spring Security filter chain for secure request processing.

Education

B.E in Computer Science and Engineering - Dr. Ambedkar Institute of Technology, BENGALURU, 2024 - CGPA – **8.95**

Certifications and Achievements

- **Database Management System** – NPTEL
- **HackerRank** - JAVA (Basic), SQL (Basic, Intermediate, Advanced), Python (Basic)
- **Prompt Engineering for ChatGPT** – Coursera
- Solved 400+ algorithmic problems covering DSA, graphs, DP, trees, and system design fundamentals.
